November 19, 1958

They should be repacked and marked as required by the ICC Tariff 10. The packing regulations as stated in the ICC Tariff are "Shaped charges, Commercial, having conical cavities that are covered shall be paired together with the cavities facing each other and with one or more pairs in fiber tube or so arranged that the conical cavities of the shaped charges at the ends of the column facing toward the center of the tube." Standard wooden ammunition boxes with gross packed weight not to exceed 140 pounds should be constructed to hold the fiber tubes containing the shaped charges arranged as mentioned above in the Regulations. The shaped charge in the fiber tube must fit snugly with no excess space and the fiber tube must be packed snugly with no extra space in the outside container. Sawdust is recommended as a filler for the outside pack.

The above mentioned outside boxes shall be marked, as in accordance with ICC, as follows:

The top and two sides shall be marked "Commercial shaped charges, MK II or MK III, High Explosives, Dangerous."
